

PUBLIC NOTICE

Dear Residents,

This letter is to inform you of an upcoming waterline construction project planned to take place primarily along Harrison Street between Allen Street and White Street. Additional areas of work include some alleyways and interconnection points. An overview map of the area is included for your convenience.

The City of Maumee takes pride in providing reliable, high-quality water to customers throughout our distribution area. To ensure reliability of our network, The City regularly replaces and upgrades aging infrastructure that may be susceptible to breaks and leaks. This will reduce the likelihood of future water main breaks and service disruptions in the area.

The water main will be replaced using open cut construction. Once the water main is installed and tested, the water services will be switched over to the new water main. Upon completion of the water line work, the disturbed portions of the roadway and yards will be repaired and restored.

You may experience a temporary disruption to your water service at some point during the project. For all planned disruptions, you will be notified at least 24 hours in advance. On the day your service is switched over to the new water main, someone will attempt to contact you before your water is turned off by knocking on your door. Upon reinstatement of water service, you will want to run water for at least 10 minutes at the highest point in your building to purge any air in your plumbing. If no one is home, a door hanger will be left with instructions on what to do when someone returns home.

The City of Maumee and its contractor, Helms & Sons Excavating Inc., will work as efficiently as possible to minimize disruptions to the neighborhood. During construction, access to homes and businesses will be maintained, but traffic may be diverted around the area via posted detours. Street parking will be restricted at times to allow for efficient traffic flow.

For questions related to this project feel free to contact me at mgriggs@maumee.org or 419-897-7154. You may also contact the contractor, Helms & Sons Excavating at 419-422-7738.

Sincerely,

Matthew Griggs
Engineering Inspection Manager
